H1 2025 Key Performance Indicators:

- aggregate sales of Group brand products globally totalled Euro 567.1 million, increasing 4.3%, and were broken down as follows:

Commercial licensee and direct sales	392.7	390.3	0.6%
Productive licensee sales	174.4	153.4	13.7%
Aggregate licensee and direct sales	567.1	543.7	4.3%

Commercial licensee and direct sales up 5.2% in Europe, a region accounting for 79.7% of aggregate sales. Sales in all other regions saw a decline: Asia and Oceania by 3.6%, the Middle East and Africa by 5.8%, and the Americas, where a new trading partner has taken over, by 33.3%.

- consolidated revenues of Euro 172.6 million (Euro 173.9 million in H1 2024, -0.7%), as follows:

 - direct sales: Euro 137.3 million (Euro 143.4 million in 2024, -4.2%); The decrease stems from the conversion of a number of distribution contracts into licensing agreements.

In order to provide a more accurate representation of the Group's operating performance during the period, the indicators below have been prepared on the basis of pro-forma consolidated financial statements, which exclude the income statement impacts of non-recurring charges related to the conclusion of commercial relationships or the settlement of various disputes (for approx. Euro 2.3 million), in addition to the extraordinary income statement impacts of the divestment of approx. 40% of the stake held in K-Way S.p.A. and in particular the related costs (amounting to Euro 18.3 million). The gain from the sale, provisionally amounting to Euro 140.1 million, is only recognisable in the separate financial statements of BasicNet S.p.A.

- **EBITDA***: Euro 15.1 million (Euro 17.6 million in H1 2024);
- **EBIT***: Euro 4.4 million (Euro 8.7 million in H1 2024), after amortisation and depreciation of Euro 4.9 million and depreciation on the right-of-use for Euro 5.7 million, increasing due to the new openings (8 direct sales points), as part of retail segment development;
- **net profit***: Euro 0.8 million (Euro 2.8 million in H1 2024);
- **net financial position with banks**, including the effects of the sale of the stake in K-Way S.p.A., is positive for Euro 26.3 million (Euro -90.8 million at December 31, 2024), while the **net financial position**, including Euro 52.5 million of right-of-use payables, is Euro -32.6 million. (-142.0 million at December 31, 2024, including Euro 43.1 million of right-of-use payables).

The Debt/Equity Ratio improved significantly, from 0.83 in December 2024 to 0.11 at June 30, 2025.

* pro-forma net of a number of extraordinary and non-recurring costs, including the extraordinary effects from the sale of approx. 40% of the company's stake in K-Way S.p.A.

2025 SIGNIFICANT EVENTS

On February 28, 2025, after receiving clearance from the European Anti-trust Authority, Permira completed the undertaking of a stake in K-Way S.p.A..

K-Way S.p.A. is now indirectly held approx. 60% by BasicNet and for approx. 40% by Permira through its Permira Growth Opportunities II fund, and for a minimum stake lower than 0.5% held by a number of key managers of K-Way S.p.A.

In May, the company BasicInvestments S.r.l. was established to develop future strategic investments for the Group, with the aim of providing a flexible but structured tool that also allows for industrial - in addition to financial - synergies. The initial investment of Euro 3 million involves the subscription of shares in the company Florence S.r.l., which holds a significant stake in LuisaViaRoma (LVR), one of the leading luxury e-tailers globally.

REGIONAL COMMERCIAL PERFORMANCES

Commercial operations focused mainly on the renewal of expiring licensing contracts. New agreements were signed for the Kappa® brand in North America and Azerbaijan and for the Superga® brand in North America.

The main communication initiatives in the period concerned:

Kappa®, which is sponsoring the Peugeot TotalEnergies team in its third season and for the next two years in the FIA World Endurance Championship (WEC), will also, for the next four seasons, be an official technical partner alongside Briko® of the Italian Triathlon Federation, accompanying athletes all the way to the 2028 Olympic Games in Los Angeles. At the same time, the **Kappa®** Authentic brand, a Kappa® spin-off fashion brand, was relaunched.

In terms of collaborations, Kappa® launched two capsule collections, the first with Acne Studios and the second with 433, the world's largest digital football community; it also extended its collaboration with GO Fit, a well-known Spanish sports centre chain, to the Italian market. Kappa and ACF Fiorentina met with LuisaViaRoma, an international luxury fashion retailer, to unveil the team's fourth kit for the 2024-2025 season, while the Company teamed up with AS Monaco to collaborate with renowned Parisian fashion brand Koché.

K-Way®: in addition to the presentation of the R&D collection for the 2025-2026 autumn/winter season at the Milan and Paris Fashion Weeks, it sponsored the 1000 Miglia, the Terraforma cultural festival, and continued its collaboration with the nonprofit association "Coral Gardeners".

For 2025, renewed and new collaborations include Marcolin, which saw the debut of the K-Way® eyewear and sunglasses collection, and capsule collections developed with the Palace and Venice M'Art brands. The collaboration with the Italian Golf Federation, accompanied by the launch of a new collection of technical apparel, marks K-Way®'s entry into the golfing world.

K-Way® launched a new advertising campaign with Global Brand Ambassador Shownu, South Korean Gen Z idol, and also celebrated the brand's 60th birthday with the exhibition In Y/Our Life - The Hidden Side of Everyday Things in Milan and London, with its final stop in Paris still to come.

Superga® was on show at Paris Fashion Week, presenting its new line dedicated to rubber with a temporary showroom. It also presented at the Pitti show with an exhibition space at the Fortezza da Basso, where the focus was on celebrating the centenary of its iconic 2750.

Collaborative activities with other brands, including Armor-Lux, a historic Breton brand, continued with the development of a capsule collection of shoes and garments. Finally, Superga® was an official partner of Orticola di Lombardia, where it showcased its Gomma collection.

Sebago® presented its new collection at Paris Fashion Week and the Pitti show. It launched new collaborations with Essentiel Antwerp and developed a capsule collection with Weekend Max Mara®.

Briko® was once again the technical sponsor of the VF Group Bardiani - CSF Faizanè team at the Giro d'Italia, the 47th Kinder Joy of Moving Grand Prix for the very young, and the Title Sponsor of the Granfondo Internazionale. It also announced the launch of a collaboration as the official technical partner of the Italian Triathlon Federation and participated in the Prowinter and Sport Achat fairs.

** *Data not audited*

Commercial licensee and direct aggregate sales of Euro 392.7 million increased 0.6%, from Euro 390.3 million in the same period of the previous year; continental level growth is commented upon in the introductory paragraphs to this Report.

The **sales of the productive licensees** (Sourcing Centers) are only made to commercial licensees or entities within the "Powered by BasicNet" scope. The production licenses issued to the Sourcing Centers, differing from those issued to the commercial licensees, do not have regional limitations, but are rather based on technical production and business competences. Product sales by the Sourcing Centers to commercial licensees are made in advance of those made by the latter to the end customer. The increase (13.7%) derives from the introduction of the new K-Way Le Vrai 4.0 line, the strengthening of the "never out of stock" programmes to ensure the usability of key items in directly operated stores, and in general from the increased sourcing of Group branded products in relation to the autumn/winter 2025 season.

Overall, **consolidated direct sales** were Euro 137.3 million (Euro 143.4 million in H1 2024) - a contraction of 4.2%. Against this backdrop, e-commerce - a sector in which the Group is investing to consolidate its development - reported growth of 0.9%.

The **contribution margin on sales** grew 2.2%, from Euro 59.9 million in 2024 to Euro 61.3 million in 2025. The margin was 44.6% (compared with 41.8% in 2024).

Other income of Euro 3.6 million decreased by approx. Euro 5.6 million on the first half of 2024, which included income from the early termination of a multi-year agreement.

Sponsorship and media spend of Euro 22.6 million compares to Euro 20.4 million in the previous year. The increase from the prior year is mainly attributable to the increase in costs related to sponsorships of strategic importance to global brand development and to the significant marketing efforts, particularly in relation to the K-Way brand.

As previously outlined, in order to facilitate comparison with the same period of the previous year, the following indicators are presented adjusted for a number of extraordinary and non-recurring costs, including the extraordinary effects from the sale of approx. 40% of the company's stake in K-Way S.p.A.

Personnel costs rose from Euro 24.4 million in 2024 to Euro 26.2 million in 2025, an increase of approx. Euro 2.2 million, due mainly to the expansion of strategic areas of the Group, the strengthening of the K-Way S.p.A. structure and the opening of new points of sale. The average number of employees in H1 2025 was 1,158, compared to 1,078 in 2024.

Overhead costs, i.e. **Selling and general and administrative costs and royalties expenses** increased from Euro 36.4 million in H1 2024 to Euro 35.6 million in H1 2025.

Pro-forma EBITDA: Euro 15.1 million (Euro 17.6 million in H1 2024, -14.2%).

Pro-forma EBIT: Euro 4.4 million (Euro 8.7 million in H1 2024), after amortisation and depreciation of Euro 4.9 million and depreciation on the right-of-use for Euro 5.7 million, increasing due to the new openings (8 direct sales points), as part of retail segment development.

Consolidated net financial charges/income, including exchange gains and losses, reported a charge of Euro 1.5 million, compared to Euro 2.4 million in the previous year.

The **pro-forma pre-tax profit** was Euro 2.9 million, compared to a Euro 6.3 million in H1 2024.

The *pro-forma net profit* of Euro 0.8 million compares to Euro 2.8 million in the previous year.

With regard to the change in non-current assets, amortisation and depreciation increased by Euro 10.7 million during the year. Investments were also made for the development of computer programmes (Euro 1.9 million). The increase in non-current assets also includes key money related to the opening of new outlets of Euro 0.6 million, including Euro 0.4 million in France, Euro 112 thousand in England and Euro 75 thousand in Spain, in addition to the balance of Euro 1.4 million arising from the acquisition of a franchisee of K-Way France.

Group shareholders' equity increased from Euro 170.3 million in December 2024 to Euro 298.8 million in H1 2025.

PRINCIPAL RISKS AND UNCERTAINTIES

The BasicNet Group is subject to a variety of strategic, market, financial and environment risks, as well as general business operational risks.

Strategic risks

These risks arise from factors that may comprise the value of the trademarks that the Group implements through its Business System. The Group requires the capacity to identify new business opportunities and markets and appropriate licensees for each market. The Group monitors the activities of its licensees and detects any problems on-line in the management of the brands in the various regions. However, as the commercial license contracts usually establish the advance payment of guaranteed minimum royalties, economic conditions on certain markets may impact the financial capacity of certain licensees, temporarily reducing royalties, particularly where such licensees had previously exceeded the guaranteed minimums.

Risks associated with economic conditions

The Group retains that its Business System has the flexibility needed to swiftly respond to changes in customers' tastes and to limited and localised consumer slowdown. However, the Group may be exposed to economic crises and social and general unrest, which may impact on consumer trends and the general economic outlook.

Macroeconomic risks

The Group's widespread presence in many countries around the world makes it possible to reduce the risks inherent in a business that is heavily concentrated in specific regions. Nonetheless, deteriorations in economic, social, political, or environmental circumstances in one or more markets could have an adverse effect on sales and on financial performance. In addition, restrictions set by national or supranational bodies on personal travel, such as in response to the pandemic or other international crises, or restrictions on exports as a result of commercial or financial sanctions, could have an impact on sales, particularly in the specific regions concerned. The Group is committed to preventing or mitigating environmental risks in various ways, as described in detail in the 2024 Non-Financial Report.

Licensee network operating risks

The adoption of a licensee network system has enabled the Group brands to expand and quickly enter new markets. The Group monitors the activities of its licensees and detects any problems on-line in the management of the brands in the various regions. The most important factor of the system is therefore to guarantee the capacity to identify new business opportunities and markets and appropriate licensees for each market. The main risk is therefore the undertaking of licensees not equipped for the task and the particular local market.

The Group has adopted specific measures to assess licensees and for the drawing up of contracts to offset this risk, including:

- the parallel use of Group management and specialised local information sources to identify and negotiate with licensees;
- the use of license contracts based on a standard consolidated over time, prepared by outside international or local specialised legal experts to handle any exceptions, amendments or integrations, established through negotiations or for compliance with local rules;
- the use of three/five-year license contracts which include way-out clauses for underperforming licensees.

The Group in addition in 2012 put in place the “dotcom” BasicAudit for the control, verification and analysis of licensee operational compliance, identifying any discrepancies in their operations, developing contractual clauses requiring the annual preparation of certified statements by the International Auditing Firm to certify the data sent to the Group, and carrying out specific controls at licensee offices.

Risks related to BasicNet Group production

BasicNet carries out extensive selection and monitoring activities on the Sourcing Centers i.e. licensee businesses managing the production flows of Group brand finished products, which are distributed by the commercial licensees within their respective areas and has developed an IT platform which directly connects the productive and commercial licensees.

The theoretical risks identified with regards to the Sourcing Centers are:

- the possibility that the Sourcing Centers fail to identify producers who can guarantee the required quality standards of BasicNet for product packaging;
- the trust risk regarding the Sourcing Centers, which may hinder the correct identification of product costs;
- compliance risk concerning the international rules governing labour contracts and sustainability and safety compliance, which may impact the international image of the Group brands.

BasicNet has put in place specific operating mechanisms to correctly manage these risks, including:

- a selection of Sourcing Centers based on an assessment of the technical requirements to satisfy Group needs in terms of quality, volumes and production times (contained in the “Sourcing Agreement”), in addition to the financial solidity of the manufacturer, assessed through specific onsite visits and repeated on a consistent basis;
- the use of anti-trust controls that require that strategic products be produced by at least two or three Sourcing Centers (if possible in differing regions). Moreover, after five years orders are switched to a new sourcing centre, and we make sure that no factory devotes more than half of its productive capacity to our Group’s brand-name products.
- the use of contracts with Sourcing Centers stipulating the commitment of the contracting parties to comply with local and international labour and environmental regulations and the signing of a commitment to comply with the Code of Conduct, based on the key conventions of the International Labour Organisation (ILO) and the Universal Declaration of Human Rights and the Product Restricted Substances List (PRSL);
- the Sourcing Center operational cash flows are finally subject to checks by BasicAudit.

Currency risk

The Group is exposed to currency risk on merchandise purchases or royalty income from commercial licensees and sourcing centre commissions not within the Eurozone. These transactions are mainly in US Dollars and to a lesser extent in Japanese Yen, UK Sterling and Swiss Francs.

The risks on fluctuations of the US Dollar on purchases are measured, preliminary, in the preparation of the budgets and finished products price lists, so as to adequately cover the impact of these fluctuations on sales margins.

Subsequently, royalty income and sourcing commissions from sales are utilised to cover purchases in foreign currencies, within the normal activities of the Group centralised treasury management.

For the foreign currency purchases not covered by foreign currency receipts, or in the case of significant time differences between receipts and payments, forward purchase and sales contracts (flexi-term) are underwritten.

The Group does not undertake derivative financial instruments for speculative purposes.

Credit risk

Royalty trade receivables are largely secured by bank guarantees, corporate sureties, letters of credit, guarantee deposits, or advance payment, provided by licensees.

Royalty trade receivables are largely secured by bank guarantees, corporate sureties, letters of credit, guarantee deposits, or advance payment, provided by licensees.

Sourcing commission receivables are covered by the payables of the subsidiaries Kappa S.r.l., K-Way S.p.A., Sebago S.r.l., Superga S.r.l., Kappa France S.a.s. and K-Way France S.a.s. to Sourcing Centers.

Receivables from Italian and European footwear and apparel retailers within the subsidiaries are monitored continually by the credit department of the company alongside specialised legal recovery firms and partners throughout the country, commencing from the customer order. Receivables from the brand stores under franchises are paid weekly, related to their sales and do not present substantial insolvency risks.

Liquidity risk

The sector in which the Group operates is exposed to seasonal factors, which impact upon the timing of goods procurement compared to sales, in particular where the products are acquired on markets with favourable production costs and where the lead times are however much longer. These factors also have seasonal effects on the financial cycle of the Group's commercial companies.

Short-term debt to finance working capital needs comprises "import financing" and "self-liquidating bank advances" secured by the order backlog. The Group manages the liquidity risk through close control on operating working capital with specific attention on inventories, receivables, trade payables and treasury management, with real-time operational reporting indicators or, for some information, at least on a monthly basis, reporting to Senior Management.

Interest rate risk

The interest fluctuation risks of some medium-term loans were hedged with conversion of the variable rate into fixed rates (swaps).

Environmental risks

Climate change and the transition to a more sustainable economy are driving a constantly changing environment with significant implications for businesses. The adoption of new regulations, changes in the markets and in consumer preferences, technological innovations, and the increasing stakeholder focus on sustainability all pose both challenges and opportunities. In this landscape, four main categories of transition risks have been identified that may affect the Group, both operationally and strategically.

The analyses conducted have identified four categories of transition risk and their impact on the Group:

- **Market risks:** changes in the cost of energy and raw materials, together with consumer preferences, can lead to significant impacts. In addition, the increase in insurance costs related to Group assets is influenced by the rising frequency of natural disasters.

- **Legislative and regulatory risks:** compliance with increasingly stringent laws and regulations imposes stricter requirements for products to reduce emissions and waste and to increase circularity. The impact of these factors may vary as the regulatory landscape evolves.
- **Technological risks:** the need to acquire new technical capabilities, implement advanced systems and optimise the use of business performance data is a transformative element with varying impacts depending on market conditions.
- **Reputational risks:** businesses are subject to increasing expectations regarding their ability to meet the challenges of transition, supply chain management, and transparency in communicating their sustainability strategy, with significant consequences on brand perception.

While the Group has not currently adopted a formalised transition plan or specific policies to manage transition risks, principles, procedures, and control systems have been established to manage and mitigate environmental risks, including climate risks, that concern suppliers of raw materials and processing services. As formalised in the Ethics Code and in the Code of Conduct, the Group is committed to adopting and disseminating responsible environmental protection attitudes. As provided under the Code of Conduct, the Sourcing Centres are also required to comply with all environmental laws and regulations, as well as maintaining procedures to notify the local Authorities in a timely manner of any environmental incidents arising from the work carried out by the Sourcing Centres. In addition, the Group is committed to finding the most suitable solutions to ensuring the responsible use of resources and reduced energy consumption in its operations and waste management.

Specifically with respect to risks related to potential operational disruptions due to natural events or other external factors, the Group has adopted specific measures, including business continuity plans and insurance coverage, to protect the integrity of assets and limit the consequences of any operational downtime.

Risks relating to legal and tax disputes

The Group may be involved in legal and tax disputes, concerning specific issues and in various jurisdictions. Considering the uncertainties relating to these issues, it is difficult to predict with precision any future payments required. In addition, the Group has instigated legal action for the protection of its Trademarks, and of its products, against counterfeit products. The cases and disputes against the Group often derive from complex legal issues, which are often subject to varying degrees of uncertainty, including the facts and circumstances relating to each case, jurisprudence and different applicable laws.

In the normal course of business, management consults with its legal consultants and experts in fiscal matters. The Group accrues a liability against disputes when it considers it is probable that there will be a financial payment made and when the amount of the losses arising can be reasonably estimated.

The main disputes in which the Group is involved are summarised below.

Tax disputes

Alleged tax inversion Basic Properties America

Between 2018 and 2022, the Tax Agency challenged various Group foreign companies for unpaid taxes in Italy between 2011 and 2016, for a total of approx. Euro 6 million in direct taxes and VAT, plus interest and penalties. The disputes relate specifically to the alleged requalification of the US company as a tax resident in Italy and the consequent VAT treatment of royalties paid by it to the Group's other foreign companies. As they did not consider the arguments put forward by the Agency to be well-founded, the companies lodged appeals against all the tax assessments and requests for provisional suspension of the executive effects of the assessments.

The Group companies have had their claims recognised in the first and second instance for all the years in dispute.

As of today's date:

- for the years 2011-2014, the scheduling of the hearing before the Court of Cassation is still awaited. On August 27, 2024, through the State Attorney General's Office, the Tax Agency appealed the second instance judgement No. 60/2023 (which combined the appeals from 2011 to 2014 for all the companies involved); on October 11, 2024, the Group companies filed a counter-appeal pursuant to Article 370 of the Code of Civil Procedure;
- for FYs 2015 and 2016, the deadline for the Agency to appeal to the Court of Cassation expires at the end of 2025.

Commercial disputes

FISI pre-emption right

BasicItalia S.p.A. (now “BasicItalia S.r.l.”) has exercised, on June 3, 2021, its pre-emption right, under the agreement concluding on April 30, 2022, to enter into a new sponsorship contract for the Italian Winter Sports Federation through the Kappa brand for the four-year period 2022-26, which includes the Milan Cortina 2026 Olympics. Nevertheless, FISI considered that the exercise of the pre-emption right by BasicItalia was not sufficient to conclude a contract and informed the BasicNet Group of its intention to sign a sponsorship agreement with a third party.

The judgment in the case on the merits, issued on February 23, 2023, confirms this protective order issued on July 14, 2022 and the position of BasicItalia, namely that from the moment of BasicItalia's acceptance of the conditions offered by FISI, and thus from June 3, 2021, a new sponsorship contract was concluded between BasicItalia and FISI for the 2022/23 seasons until the 2025/26 season, also recognising a right of first refusal in favour of Basic Italia for the following four-year period.

As a result, the court ordered FISI to fulfil its contractual obligations, prohibiting FISI from entering into supply and sponsorship contracts with third parties other than BasicItalia and from using in its competitive activities clothing items with trademarks other than those indicated in the contract between BasicItalia and FISI.

Regarding damages, the Court ruled that the damage resulting from FISI's breach of duty can only be fully assessed and quantified following the last competitive season until at least 2025/2026.

FISI appealed the judgment by writ of summons served on March 27, 2023, requesting to suspend and/or revoke the provisional enforceability of the judgment and to uphold the appeal on the basis of the conclusions advanced by FISI in the first instance judgment and, by way of counterclaim, to establish BasicItalia's failure to comply with the provisions of the Contract and to declare the termination of the Contract for non-performance with an order to pay damages.

On July 20, 2023, FISI's request for a stay of the enforceability of the first instance ruling was granted by the Court of Appeals.

In a ruling published on September 17, 2024, the Milan Court of Appeals did not uphold the first instance ruling regarding BasicItalia's demands and declared that BasicItalia's acceptance of the proposal received from FISI in application of the right of first refusal would not have established a contract between BasicItalia and FISI.

BasicItalia appealed the ruling in the Court of Cassation, notifying FISI on March 17, 2025, while FISI filed a counter-appeal on April 28, 2025. A date for the Council Chamber meeting is still awaited, following which the Court of Cassation will rule. The Court of Cassation will grant a deadline to the Public Prosecutor at least 20 days before the Council Chamber meeting and a deadline to the parties at least 10 days before the meeting to file briefs.

TREASURY SHARES

Under the treasury share buy-back programme, authorised by the Shareholders' Meeting of April 17, 2025 and concluding at the date of the Shareholders' AGM for the approval of the 2025 Annual Accounts, at the date of this report 415,700 treasury shares had been acquired (0.77% of the Share Capital) at an average price of Euro 8.16, for a total outlay of Euro 3.4 million.

At June 30, 2025, BasicNet held a total of 7,815,000 treasury shares (equal to 14.472% of the Share Capital and 9.842% of voting rights), for an investment of approx. Euro 38.7 million.

The consolidated financial statements in this document were approved by the Board of Directors of BasicNet S.p.A. on July 31, 2025. The present document is subject to limited audit.

2. FORM AND CONTENT

The main accounting principles adopted in the preparation of the consolidated half-year financial statements and Group financial reporting are described below.

This document has been prepared in accordance with IFRS issued by the International Accounting Standards Board (IASB) and approved by the European Union. IFRS include all the revised international accounting standards (IAS) and all interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”), previously known as the Standing Interpretations Committee (“SIC”).

The half-year consolidated financial statements are prepared under the historical cost convention (modified where applicable for the valuation of certain financial instruments), as well as on the going concern assumption.

The Group consolidated half-year financial statements include the financial statements at June 30, 2025 of BasicNet S.p.A. and all the Italian and foreign companies in which the Parent Company holds control - directly or indirectly. For the financial statements of the US, Asian, Spanish, English, Swiss, Irish and French subsidiaries, which utilise local accounting standards, as not obliged to adopt IAS/IFRS, the appropriate adjustments were made for the preparation of the consolidated financial statements in accordance with international accounting standards.

The accounting policies utilised for the preparation of the Condensed Consolidated Half-Year Financial Statements at June 30, 2025 are the same as those utilised for the previous year, with the exception of the adoption of new standards and amendments from January 1, 2025. The Group has not adopted in advance any accounting standard, interpretation or amendment issued but not yet in effect.

Accounting standards, amendments and interpretations applied from January 1, 2025

Amendments to IAS 21: The Effects of Changes in Foreign Exchange Rates

The amendments to IAS 21 *The Effects of Changes in Foreign Exchange Rates* specify how an entity should consider whether a currency is convertible and how it should determine the spot exchange rate when it is not convertible. The amendments also require disclosures that enable users of the financial statements to understand how the non-convertible currency affects, or is expected to affect, the entity's operating results, balance sheet, financial position and cash flows.

On November 12, 2024, Regulation (EU) No. 2024/2862 was issued, implementing certain amendments to IAS 21 - The Effects of Changes in Foreign Exchange Rates. The amendments enter into force from fiscal years beginning on or after January 1, 2025. In applying the changes, the entity may not restate comparative information.

These amendments did not have any impact on the Group financial statements.

3. FORMAT OF THE FINANCIAL STATEMENTS

The BasicNet Group presents its income statement by nature of cost items; the assets and liabilities are classified as current or non-current. The statement of cash flows was prepared applying the indirect method. The format of the consolidated half-year financial statements applied the provisions of Consob Resolution No. 15519 of July 27, 2006 and Notice No. 6064293 of July 28, 2006 on financial disclosure requirements. With reference to Consob Resolution No. 15519 of July 27, 2006, transactions with related parties are described in Note 48.

4. CONSOLIDATION PRINCIPLES

The consolidated half-year financial statements were prepared including the Financial Statements at June 30, 2025 of the Group companies included in the consolidation scope, appropriately adjusted in accordance with the accounting policies adopted by the Parent Company.

The condensed consolidated half-year financial statements of the BasicNet Group are presented in Euro thousands, where not otherwise stated; the Euro is the functional currency of the Parent Company and the majority of the consolidated companies.

Financial statements in currencies other than the Euro are translated into the Euro applying the average exchange rate for the year for the income statement and the exchange rate at the date of the operation in the case of significant non-recurring transactions. The balance sheet accounts are translated at the year-end exchange rate. The differences arising from the translation into Euro of the financial statements prepared in currencies other than the Euro are recorded in a specific reserve in the Comprehensive Income Statement.

The exchange rates applied are as follows (for 1 Euro):

Currency	June 30, 2025		December 31, 2024		June 30, 2024	
	Average	At period end	Average	At period end	Average	At period end
US Dollar	1.1009	1.1720	1.0808	1.0389	1.0792	1.0705
HK Dollar	8.5874	9.2001	8.4315	8.0686	8.4385	8.3594
Japanese Yen	162.3933	169.1700	164.0558	163.0600	166.1500	171.9400
UK Sterling	0.8410	0.8555	0.8450	0.8292	0.8535	0.8464
Swiss Franc	0.9409	0.9347	0.9534	0.9412	0.9648	0.9634
Vietnamese Dong	28,329	30,583	27,103	26,478	26,996	27,250

The criteria adopted for the consolidation were as follows:

- a) the assets and liabilities, as well as the income and charges of the financial statements consolidated under the line-by-line method are included in the financial statements of the Group, without consideration of the holding in the subsidiary. The carrying value of the investments are eliminated against the relative net equity of the subsidiaries.
- b) the positive differences resulting from the elimination of the investments against the book net equity at the acquisition date is allocated to the higher values attributed to the assets and liabilities acquired, and the residual part to goodwill. On the first-time adoption of IFRS, the Group has chosen not to apply IFRS 3 - Business combinations in retrospective manner for the acquisitions made prior to January 1, 2004;
- c) the payables/receivables, costs/revenues between consolidated companies and the gains/losses resulting from inter-company operations are eliminated, as are the effects of mergers and the sale of business units between companies in the consolidation scope.

As illustrated in Attachment 1, at June 30, 2025 the Group is composed solely of subsidiaries owned directly or indirectly by the Parent Company BasicNet S.p.A., or jointly controlled; there are no associated companies or investments in structured entities.

Control exists where the Parent Company BasicNet S.p.A. simultaneously:

- exercises decision-making power over the investee, i.e. has the capacity to manage its main activities, therefore those activities which have a significant impact on the investee's results;
- has the right to variable profits or losses from its investment in the entity;
- has the capacity to utilise its decision-making power to establish the amount of profits devolving from its investment in the entity.

The existence of control is verified where events or circumstances indicate an alteration to one or more of the three factors determining control.

Investments in associates and joint ventures are consolidated at equity, as established respectively by IAS 28 - Investments in associates and joint ventures and by IFRS 11 – Joint arrangements.

An associate is a company in which the Group holds at least 20% of voting rights or exercises significant influence - however not control or joint control - on the financial and operational policies. A joint venture is a joint control agreement, in which the parties who jointly hold control maintain rights on the net assets of the entity. Joint control concerns the sharing, under an agreement, of the control of economic activities, which exists only where the decisions regarding such activities requires unanimity by all parties sharing control.

Associates and joint ventures are consolidated from the date in which significant influence or joint control begins and until the discontinuation of such. Under the equity method, the investment in an associated company or a joint venture is initially recognised at cost and subsequently the carrying amount is increased or decreased to recognise the associated company's share of the profit or loss after the date of acquisition. The share of profits (losses) of the investment is recognised to the consolidated income statements. Dividends received from the investee reduce the book value of the investment.

If the share of losses of an entity in an associate or a joint venture is equal to or greater than its interest in the associate or joint venture the entity discontinues the recognition of its share of further losses. After the investor's interest is reduced to zero, additional losses are provisioned and a liability is recognised, only to the extent that the investor has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. If the associate or the joint venture subsequently reports profits and loss, the investor resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

Consolidation scope

The consolidation scope includes the Parent company BasicNet S.p.A. and the Italian and foreign subsidiaries in which BasicNet S.p.A. exercises direct, or indirect, control. Attachment 1 contains a list of consolidated companies under the line-by-line method, as well as the complete list of Group companies, registered office, corporate purpose, share capital and direct and indirect holdings.

Information by business segment and geographic area

Three operating segments have been identified within the BasicNet Group: i) clothing, footwear and accessories, ii) real estate, iii) investments. The relevant information is reported in Note 6.

The information by geographic area has significance for the Group in relation to royalty income and direct sales, and therefore was included for the two respective items. The breakdown of licensee aggregate sales by geographic area, from which the royalties derive, is reported in the Directors' Report.

5. OTHER INFORMATION

The subsequent events to the end of the period and the outlook for the current year are reported in the Directors' Report.

K-Way transaction

On February 28, 2025, having received clearance from the European Antitrust Authority, the Group completed Permira's undertaking of a stake in K-Way S.p.A.. The transaction comprised a number of transfers, following which the share capital of K-Way is now indirectly held approx. 60% by BasicNet and for approx. 40% by Permira through its Permira Growth Opportunities II fund, and for a stake of less than 0.5% by a number of key managers of K-Way S.p.A.:

- BasicNet established the three sub-holdings - K-Way TopCo (wholly-owned), K-Way MidCo (wholly-owned by K-Way TopCo) and K-Way BidCo (in turn, wholly-owned by K-Way MidCo);
- BasicNet transferred a stake comprising approx. 57% of the share capital of K-Way S.p.A. to K-Way TopCo;
- Permira and some key K-Way managers made cash contributions to K-Way TopCo of more than Euro 170 million;
- The stake in K-Way and the cash contributions were in turn transferred by K-Way TopCo to K-Way MidCo and by the latter to K-Way BidCo;
- K-Way BidCo then purchased the remaining stake in K-Way, constituting approx. 43% of the capital, from BasicNet, for an amount of approx. Euro 190.9 million following the price adjustments resulting from the calculation of the net financial position at the closing date;
- The purchase price of Euro 125.9 million due from K-Way BidCo to BasicNet was paid in cash and through the granting of a Vendor loan for Euro 65 million.

The impact of this transaction on the BasicNet Group's consolidated financial statements resulted in:

- An increase in shareholders' equity and cash and cash equivalents for cash contributions made by third parties, amounting to Euro 170 million;
- The recognition to the income statement of transaction costs totalling Euro 18.3 million and the consequent reduction of cash and cash equivalents against the settlement of the respective payables;
- The recognition of current taxes on capital gains realised by BasicNet S.p.A. for Euro 2.4 million.

The cash latterly received by BasicNet S.p.A. was used for Euro 23.6 million for the early repayment of the mortgage taken out by BasicVillage with Banco BPM (Note 34) and for Euro 90.1 million for a temporary investment in financial securities with varying maturities (Notes 23 and 28) with primary financial institutions as counterparties.

As part of the transaction, K-Way and its subsidiaries fully repaid the medium to long-term loans (Note 34) and signed a revolving credit line totalling Euro 65.0 million with BNL, Banco BPM, BPER Banca and Unicredit.

Information required by Law No. 124 of August 4, 2017, Article 1, paragraph 125

In accordance with Article 1, paragraph 125 of Law 124/2017, the Group has not received any grants from public bodies in excess of Euro 10 thousand.

At June 30, 2025, there were stock grant rights assigned to certain Group managers and employees, granted on the basis of the Plan approved by the Shareholders' Meeting of April 16, 2024, whose potentially dilutive effect is reflected in the Diluted earnings per ordinary share.

The change in the weighted average number of ordinary shares outstanding between 2025 and 2024 relates to the number of treasury shares acquired in the year.

Closing net book value at 30.06.25	59,718	6,391	7,658	49	73,816

The increase in “concessions, brands and similar rights” is due to the capitalisation of costs incurred for the registration of trademarks in new countries, for renewals and extensions and for the purchase of software licenses. Amortisation in the period concerns the Jesus Jeans brand, amortised over 20 years, as not yet reaching a market positioning equal to that of the principal brands.

At June 30, 2025, the Kappa and Robe di Kappa brands report a book value of Euro 15.3 million, with the Superga brand reporting a book value of Euro 21.3 million; the K-Way brand was valued at Euro 9.4 million, the Sebago brand at Euro 12.1 million and the Briko brand at Euro 0.9 million. The Kappa, Robe di Kappa, Superga, K-Way, Briko and Sebago brands are considered intangible assets with indefinite useful life and as such are subject to an impairment test at least annually.

The book value of the Sabelt brand, for which the Group is worldwide licensee for the “fashion” classes, held through the two joint ventures, reflects the value of the investment.

At June 30, in application of the provisions of IAS 36 on at least annual impairment testing and in view of the fact that the profitability forecasts drawn up in the financial statements at December 31, 2024 for all the CGU’s were substantially achieved during the first half of the year, the Group deemed that there were no indicators of any impairment losses.

The account “software development” increased approx. Euro 1.8 million for investments and decreased Euro 1.3 million for amortisation in the year.

The account “other intangible assets” principally includes improvements related to the franchising project and recorded investments of Euro 1.3 million and amortisation of Euro 0.4 million.

The “Banco BPM Mortgage” was disbursed in September 2022 for Euro 31.5 million and has a ten-year duration, repayable in quarterly instalments. The variable rate, equal to the quarterly Euribor +150 points, was hedged for 30% of the notional amount at a fixed rate of 3.52%. The loan, secured by a first level mortgage on the BasicVillage in Turin and the adjacent property, the BasicVillage in Milan, and the property on Strada Cebrosa, made it possible to fully refinance the debt arising from the Group's real estate operations. During the year, the Group decided, so as to best allocate cash, to repay the remaining loan early, guaranteeing an annual savings quantifiable at Euro 1 million due to lower interest expenses.

The “BPM Banco Unsecured Loan” was issued in September 2020 for Euro 6 million and is of six-year duration, repayable in quarterly instalments from December 2022 at a quarterly Euribor rate plus 135 basis points (Note 45). The loan funded Basic Trademark's purchase of the Kappa Japan brand (now Kappa S.r.l.). No financial covenants are stipulated, although the maintenance of a number of ownership conditions are required concerning BasicNet S.p.A., in particular that the overall investment (direct or indirect) of BasicWorld S.r.l. in BasicNet S.p.A. should not reduce below 30%, in addition to the constraint of maintaining the Group's total shareholding in Kappa.

For the loans disbursed in 2020 under the SMEs Guarantee Fund, the following should be noted:

1. BasicNet: Intesa loan in October 2020 disbursed for Euro 5.5 million; it has a six-year term, repayable in quarterly instalments, starting from December 2022, at a fixed rate. The Fund's guarantee covers 90% of the amount disbursed;
2. BasicItalia: Intesa loan in October 2020 disbursed for Euro 5.5 million; it has a six-year term, repayable in quarterly instalments, starting from December 2022, at a fixed rate. The contractual terms provide that the use of the related cash is restricted to the payment of suppliers for the purchase of services and goods and the payment of salaries to employees. The Fund's guarantee covered 90% of the amount disbursed. During the period under review, as part of the transaction outlined in the Directors' Report, the Group repaid the amount still due in advance;
4. Kappa: BPM Banco Loan issued in October 2020 for Euro 5.5 million and is of six-year duration, repayable in quarterly instalments from January 2023 at a quarterly Euribor rate plus 125 basis points (Note 46). The contractual terms provided that the use of the relative liquidity was tied to the purchase of the Kappa Japan brand. The Fund's guarantee covers 90% of the amount disbursed;

The "Intesa KFF Loan" was disbursed in 2019 for Euro 3.6 million to Kappa France by the French branch of Banca Intesa Sanpaolo S.p.A. 47. CLASSIFICATION OF THE FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The principal risks and uncertainties of the Group activities are described in the Directors' Report.

The financial instruments of the BasicNet Group include:

- cash and cash equivalents and bank overdrafts;
- medium/long-term loans and lease financing;
- derivative financial instruments;
- trade payables and receivables.

It is recalled that the Group only subscribes to cash flow hedges, to hedge against interest and currency risks.

In accordance with the requirements of IFRS 7 in relation to financial risks, the types of financial instruments present in the financial statements, with indication of the valuation criteria applied, are reported below:

	Financial instruments at fair value recorded through:		Financial instruments at amortised cost	Non-listed investments valued at cost	Book value at 30.6.2025
	Income statement	Shareholders' Equity			
Assets:					
Equity invest. & other financial assets	-	-	-	55,439	55,439

Other current liabilities	-	-	21,413	-	21,413
Derivative financial instruments	-	7,166	-	-	7,166

The financial risk factors, identified in IFRS 7 – Financial instruments: additional disclosures, are described below:

- the risk that the fair value or the future cash flows of a financial instrument fluctuate following changes in market prices (“market risk”). The market risk includes the following risks: price, currency and interest rates:
 - a. the risk that the fair value or the future cash flows of a financial instrument fluctuate following changes in market prices (other than changes determined from interest rate or currency risk), whether the changes are determined by specific factors related to the financial instrument or its issuer, or whether it is due to factors which influence all similar financial instruments traded on the market (“price risk”);
 - b. the risk that the fair value or the future cash flows of a financial instrument fluctuate following changes in currency prices (“currency risk”);
 - c. the risk that the fair value or the future cash flows of a financial instrument fluctuate following changes in market interest rates (“interest rate risk”);
- the risk that one of the parties that signs a contract of a financial nature does not comply with an obligation (“credit risk”);
- the risk that an entity has difficulty in complying with the obligations associated with the financial liabilities (“liquidity risk”);
- the risk that the loans within the companies of the Group contain clauses which allow the counterparties to request the creditor on the occurrence of certain events or circumstances the immediate repayment of the sums granted and not yet due, generating a liquidity risk (“default risk”).

Price risk

The Group is exposed to the risk of fluctuations of commodity prices relating to raw materials (wool, cotton, rubber, synthetic fibre etc.) incorporated in the finished products which the Group commercial companies acquire on international markets, as well as fluctuations in the cost of oil which influences transport costs. The Group does not hedge these risks as not directly dealing with raw materials but only finished products and is exposed for the part of the increase which cannot be transferred to the final consumer if the market and competitive conditions do not permit such.

Currency risk

The BasicNet Group has subscribed the majority of its financial instruments in Euro which corresponds to its functional and presentation currency. Operating on the international market the group is also exposed to fluctuations in exchange rates, principally the US Dollar against the Euro.

At June 30, 2025, unrealised exchange gains were recorded of Euro 633 thousand, while unrealised exchange losses were recorded of Euro 740 thousand, for a net exchange loss of Euro 106 thousand.

The amount includes the market value at June 30, 2025 of the currency hedge instruments on US Dollars (cash flow hedge), subscribed with primary credit institutions; the instrument utilised, called flexi term, operates in the form of forward currency purchases on a portion of the estimated currency needs for the purchase of goods on foreign markets, to be made in 2025 and 2026, on the basis of the goods orders already sent to suppliers, or still to be made but included in the budget.

At the consolidated half-year reporting date, there were 24 hedge transactions on US Dollar fluctuations, totalling USD 133.65 million; the relative effects are illustrated in the account “Derivative financial instruments”, in Note 45.

Group Management considers that the management and containment policies adopted for this risk are adequate.

All medium/long-term loans and leasing contracts are in Euro, therefore they are not subject to any currency risk.

Interest rate risk

The composition of the gross financial debt between fixed and variable interest rates at June 30, 2025 is shown below:

	June 30, 2025	%	June 30, 2024	%
Fixed rate	7,545	8.5%	27,434	24.4%
Variable rate	81,690	91.5%	85,035	75.6%
Gross debt	89,235	100.00%	112,469	100.00%

The interest rate fluctuation risks of some medium/term loans were hedged with conversion of the variable rate into fixed rates, as described in Note 45. On the remaining part of the debt, the Group is exposed to fluctuation risks.

Where at June 30, 2025 the interest rate on long/term loans at that date were 100 basis points higher (or lower) compared to the actual rates, there would be a higher financial charges (lower), before the tax effect, respectively of Euro +122 thousand and Euro -122 thousand.

Credit risk

The doubtful debt provision (Note 27) which includes provisions against specific credit positions and a general provision on an historical analysis of receivables, represents approx. 22.9% of trade receivables at June 30, 2025.

Liquidity risk

Liquidity risk is mitigated in the short-term period by the significant generation of cash realised by the “licenses and trademarks” segment, by the significant positive net working capital, and by the overall credit lines provided by the banking system (Note 34).

Default and debt covenant risk

The risk that the loans within the companies of the Group contain clauses (covenants) which allow the counterparties to request the creditor on the occurrence of certain events or circumstances the immediate repayment of the sums granted and not yet due, generating a liquidity risk.

The loans in place at the reporting date are not subject to financial covenants.

48. INTERCOMPANY TRANSACTIONS AND TRANSACTIONS WITH RELATED COMPANIES

The transactions between the Parent Company and its subsidiaries and between the subsidiaries were within the normal operating activities of the Group and were concluded at normal market conditions. The balance sheet and income statement effects of the transactions are eliminated in the consolidation process. Based on the information received from the companies of the Group there were no atypical or unusual operations.

BasicNet S.p.A. and, as consolidated companies, BasicItalia S.p.A., K-Way S.p.A., K-WayRetail S.r.l., Kappa S.r.l., KappaRetail S.r.l., Basic Village S.p.A., Jesus Jeans S.r.l., Sebago S.r.l., SebagoRetail S.r.l., Superga S.r.l., SupergaRetail S.r.l., and BasicAir S.r.l. have adhered to the national fiscal regime as per Article 177/129 of the CFA.

As a result of the above transaction mentioned in Note 5, from January 1, 2025, the horizontal tax consolidation regime between the foreign subsidiaries K-Way France and Kappa France concluded. This termination was a consequence of the sale of approx. 40% of K-Way's share capital, which meant that the fundamental requirement of at least 95% common control by a single entity (BasicNet S.p.A.), necessary for access to the horizontal tax consolidation regime, no longer applies. As of the aforementioned date, therefore, Kappa France and K-Way France independently determine their tax base for income tax purposes and individually pay the relevant taxes.

The transactions with related parties for the period ended June 30, 2025 are reported below:

	Investments	Trade receivables	Trade Payables	Other Income	Costs
Interests in joint ventures:					
- Fashion S.r.l.	172	-	-	-	-
Remuneration of Boards and Senior Executives and other related parties	-	-	-	-	11,522

The remuneration concerns emoluments and all other payments, pension-related or social security deriving from the role of Director or Statutory Auditor in BasicNet S.p.A. and the other companies within the consolidation scope.

49. SUBSEQUENT EVENTS

They are described in the Directors' Report.

50. CONSOB COMMUNICATION NO. DEM/6064293 OF JULY 28, 2006

Pursuant to Consob Communication DEM/6064293 of July 28, 2006, we report that there were no non-recurring significant operations during the year.

51. CONTINGENT LIABILITIES/ASSETS

The BasicNet Group is involved in some legal disputes of a commercial nature which are not expected to give rise to significant liabilities.

Alleged tax inversion Basic Properties America

Between 2018 and 2022, the Tax Agency challenged various Group foreign companies for unpaid taxes in Italy between 2011 and 2016, for a total of approx. Euro 6 million in direct taxes and VAT, plus interest and penalties.

The disputes relate specifically to the alleged requalification of the US company as a tax resident in Italy and the consequent VAT treatment of royalties paid by it to the Group's other foreign companies.

As they did not consider the arguments put forward by the Agency to be well-founded, the companies lodged appeals against all the tax assessments and requests for provisional suspension of the executive effects of the assessments.

The Group companies have had their claims recognised in the first and second instance for all the years in dispute.

As of today's date:

- for the years 2011-2014, the scheduling of the hearing before the Court of Cassation is still awaited. On August 27, 2024, through the State Attorney General's Office, the Tax Agency appealed the second instance judgement No. 60/2023 (which combined the appeals from 2011 to 2014 for all the companies involved); on October 11, 2024, the Group companies filed a counter-appeal pursuant to Article 370 of the Code of Civil Procedure;
- for FYs 2015 and 2016, the deadline for the Office to appeal to the Court of Cassation expires at the end of 2025.

Commercial disputes

FISI pre-emption right

BasicItalia S.p.A. (now "BasicItalia S.r.l.") has exercised, on June 3, 2021, its pre-emption right, under the agreement concluding on April 30, 2022, to enter into a new sponsorship contract for the Italian Winter Sports Federation through the Kappa brand for the four-year period 2022-26, which includes the Milan Cortina 2026 Olympics. Nevertheless, FISI considered that the exercise of the pre-emption right by BasicItalia was not sufficient to conclude a contract and informed the BasicNet Group of its intention to sign a sponsorship agreement with a third party.

The judgment in the case on the merits, issued on February 23, 2023, confirms this protective order issued on July 14, 2022 and the position of BasicItalia, namely that from the moment of BasicItalia's acceptance of the conditions offered by FISI, and thus from June 3, 2021, a new sponsorship contract was concluded between BasicItalia and FISI for the 2022/23 seasons until the 2025/26 season, also recognising a right of first refusal in favour of Basic Italia for the following four-year period.

As a result, the court ordered FISI to fulfil its contractual obligations, prohibiting FISI from entering into supply and sponsorship contracts with third parties other than BasicItalia and from using in its competitive activities clothing items with trademarks other than those indicated in the contract between BasicItalia and FISI.

Regarding damages, the Court ruled that the damage resulting from FISI's breach of duty can only be fully assessed and quantified following the last competitive season until at least 2025/2026.

FISI appealed the judgment by writ of summons served on March 27, 2023, requesting to suspend and/or revoke the provisional enforceability of the judgment and to uphold the appeal on the basis of the conclusions advanced by FISI in the first instance judgment and, by way of counterclaim, to establish BasicItalia's failure to comply with the provisions of the Contract and to declare the termination of the Contract for non-performance with an order to pay damages.

On July 20, 2023, FISI's request for a stay of the enforceability of the first instance ruling was granted by the Court of Appeals.

In a ruling published on September 17, 2024, the Milan Court of Appeals did not uphold the first instance ruling regarding BasicItalia's demands and declared that BasicItalia's acceptance of the proposal received from FISI in application of the right of first refusal would not have established a contract between BasicItalia and FISI.

BasicItalia appealed the ruling in the Court of Cassation, notifying FISI on March 17, 2025, while FISI filed a counter-appeal on April 28, 2025. A date for the Council Chamber meeting is still awaited, following which the Court of Cassation will rule. The Court of Cassation will grant a deadline to the Public Prosecutor at least 20 days before the Council Chamber meeting and a deadline to the parties at least 10 days before the meeting to file briefs.
